

# Motivated lab technician

September 2019

---

## 1 Biogazelle

Biogazelle is a PCR and sequencing service provider company built on a culture of providing high quality science, and based on the core values of passion, courage, collaboration and open communication. Through excellence in science and technology, Biogazelle offers first-in-class transcriptomics analyses to support the development of diagnostics and therapeutics in various disease areas.

To extend our team, we are looking for a **motivated lab technician**, with a critical mindset.

## 2 Description and goal of the function

As lab technician your main task is the practical laboratory performance of the projects assigned to you from sample reception to reporting of the results to the project manager. Various state of the art technologies are used, such as high-throughput qPCR, next generation sequencing and digital PCR.

You will be involved in the set-up of the experimental procedures and you will be responsible for the design of a practical workflow. Pro-active and independent thinking and preparation is expected. Therefore, understanding the scientific background and goals of the experiment is necessary.

It is important to work according to the internal lab standards (ISO 17025:2017, GCLP guidelines), to follow standard operating procedures (SOPs) and to respect the timelines.

A lab technician is also responsible for maintaining the laboratory equipment (performing the allocated maintenance tasks and taking care of the contacts with the relevant supplier in case of needed repairs or the fulfillment of service contracts).

You will ensure proper record keeping during all aspects of your activities and guarantee complete traceability by making adequate and timely registrations.

## 3 Competences and skills

- Bachelor's degree in biomedical laboratory technology or equivalent
- Good laboratory skills
- Experience with research and development lab activities is an asset
- Experience with the above-mentioned technologies is an asset
- Excellent communication skills, both orally and in writing
- Eager to learn
- Pro-active thinking/ critical mindset is expected
- Upright and honest attitude (respecting confidentiality, being transparent in work performance)
- Being precise (follow up to SOPs/Quality Management System guidelines, deadlines)
- Accurate in experimental work and lab administration/record keeping
- Being responsible, with customer empathy
- Able to work independently but also being a team player
- Flexible and multi-tasking – work highly organized and planned

- Able to adhere to strict safety/quality procedures and safety/quality checks
- Proficient in Microsoft Office
- Fluent in English

## 4 Our offer

- A full-time position in a young and dynamic team
- A financial package according to your experience, extended with legal benefits and meal vouchers
- Professional development and training opportunities
- Open and informal working atmosphere
- Regular team gathering with snacks and drinks

## 5 How to apply?

Please send your application letter and CV to [hr@biogazelle.com](mailto:hr@biogazelle.com)

Carefully document relevant competences and skills
